The Birds of AP

Ornithology Titles from Academic Press

The Birds of Africa Volume IV Broadbills to Chats

Edited by
**Stuart Keith, Emil K. Urban,
and C. Hilary Fry**

*"The most comprehensive
accounting of African*

*birds ever attempted. The book is simply
magnificent...Brilliant success...An essential
work."*

—WILDLIFE BOOK REVIEW

Volume IV in this definitive and authoritative work covers the first 312 of the 1200 or so passerine species which occur in continental Africa and the outlying islands. Each breeding species receives full coverage with sections on range and status, description, voice, general habits, food, and breeding biology. The text concentrates on the bird's status and biology while in Africa. Range maps are given for each bird and superspecies maps are shown where appropriate.

1992, 632 pp., \$185.00/ISBN: 0-12-137304-5

Volume III Parrots to Woodpeckers

Edited by
**C. Hilary Fry, Stuart Keith,
and Emil K. Urban**

1988, 611 pp., \$182.00/ISBN: 0-12-137303-7

Volume II Gamebirds to Pigeons

Edited by
**Emil K. Urban, C. Hilary Fry,
and Stuart Keith**

1986, 552 pp., \$182.00/ISBN: 0-12-137302-9

Volume I Ostriches to Falcons

**Leslie H. Brown, Emil K. Urban,
and Kenneth Newman**

1982, 521 pp., \$182.00/ISBN: 0-12-137301-0

The Vultures of Africa

**Peter Mundy, Duncan Butchard,
John Ledger, and Steven Piper**

For the first time ever **The Vultures of Africa** presents all 11 species in an authoritative account that will rank as one of the most important works on these fascinating yet threatened birds. Dr. Peter Mundy and his fellow authors answer every conceivable question on the biology and lifestyle of these birds in a text that is a refreshing departure from traditional bird monographs.

1992, 460 pp., \$118.50/ISBN: 0-12-510585-1

Audubon to Xantus

The Lives of Those
Commemorated in
North American
Bird Names

**Barbara Mearns
and Richard Mearns**

FROM THE REVIEWS

"Lively and entertaining, yet skillfully woven not only to show the contributions of each individual to 19th century American ornithology (for this is when most of them flourished) but also to indicate how those contributions fit together."

Lovebirds, Cockatiels, Budgerigars: BEHAVIOR & EVOLUTION

by J. Lee Kavanau, UCLA

▶▶...highly informative volume...actually several books under one cover...[the author has] enormous experience with the raising of these birds....presenting a great deal of interesting information, much of it new. Prof. Ernst Mayr, Harvard Univ.

▶▶...unique, exhaustive laboratory studies of..behavior...insightful and remarkably comprehensive scenario of..origin & evolution of birds &..roots of their behaviors....must reading for all interested in avian behavior & reproduction....wealth of information & concepts that will be of interest to all evolutionists. Prof. E. C. Olson, UCLA

▶▶...enormous amount of information....very important contribution to..study of behavior of parrot birds, about which so little is known... Prof. K. Immelmann, Univ. Bielefeld

▶▶...monumental in..scope...much fascinating reading...many intriguing subjects....enormous project.....excellent reference for..experimental behavior or evolutionary science....looking forward to..in-depth study &..to apply [the author's] concepts to..aviculture and avian veterinary medicine. G. J. Harrison, DVM, Bird World, Nov., 1987

▶▶...offers an interesting synthesis of avian evolution, in general, tying together [the author's] views on evolutionary sequences involved in thermoregulation, insulation, egg care, care of young, mode of feeding, and degree of arboreality. Auk, July, 1988

▶▶...scope..is impressive....information conveyed..is almost overwhelming....comprehensive discussions on..behavior, morphology, physiology, ecology, biogeography, and evolution of all birds.....extremely detailed discussion of the avian brain.....fascinating ideas on the evolution of bird reproductive behavior....should provide much fuel for thought & some debate among students of avian evolution.....detailed descriptions of captive bird breeding and experimentation provide numerous ideas for..research on captive birds.... a must for anyone seriously interested in avian evolution... Wilson Bull., Sept., 1989

March, 1987, xxvi + 1,001 pp., 7 indices, 1,455 refs., \$49.95

**POSTDOCTORAL FELLOWSHIP
AT THE
AMERICAN MUSEUM OF NATURAL HISTORY**

The Frank M. Chapman Memorial Fund Committee welcomes applications for the Postdoctoral Fellowship Program in the areas of evolutionary and systematic ornithology. The Fellowship is usually for one year, but applicants may apply for two years, with a review of performance after the first year.

Deadline for applications is 15 January.

For application form and brochure, please write to:

Frank M. Chapman Memorial Fund

Department of Ornithology / American Museum of Natural History
Central Park West at 79th Street New York, New York 10024-5192, U.S.A.

Birds of Europe with North Africa and the Middle East

Lars Jonsson

Illustrated by the author

Translated by David Christie

Distribution maps by Magnus Ullman

Originally published in five volumes, *Birds of Europe with North Africa and the Middle East* covers all but a few of the Western Palearctic's breeding birds, and includes information on all regularly encountered vagrants. This guide has over 400 color illustrations, including 140 completely new plates, up-to-date color maps, and a fully revised text. With species accounts, distribution maps, and illustrations on facing pages, it is practically designed and easy to use.

"Birds of Europe is far superior to all previous European field guides. Anyone with an interest in birds should own this book."—Stuart Keith, Department of Ornithology, American Museum of Natural History

Over 400 color illustrations.

Cloth: \$45.00 ISBN 0-691-03326-9

Introductory price: \$39.50 through August 31, 1993

Birds in Brazil

A Natural History

Helmut Sick

Translated by William Belton

Illustrated by Paul Barruel

With Color Plates by Paul Barruel and John P. O'Neill

Here is a substantially revised and updated English-language version of the only comprehensive, scientific treatment of Brazil's 1635 bird species. Written by the dean of Brazilian ornithologists, it not only lists every individual Brazilian species and provides detailed accounts for most of them but also gives an extensive treatment of the characteristics of each bird family found in the country. This is the definitive guide to the birds of Brazil.

Over 375 illustrations, photos, and maps.

Cloth: \$125.00 ISBN 0-691-08569-2

Introductory price: \$95.00 through August 31, 1993

All royalties will be contributed to the International Council for Bird Preservation, Pan-American Section

Illustrations from *Birds in Brazil*

Introducing...

Bird Conservation International

Published for the International Council for Bird Preservation by Cambridge University Press

A major new journal of international conservation

Bird Conservation International is a new quarterly journal focusing on the major conservation issues affecting birds – especially globally threatened species – and their habitats. Founded by the International Council for Bird Preservation, the journal provides a stimulating, international and up-to-date coverage of bird conservation topics critically important in today's world.

Why you should read Bird Conservation International

With original papers and reviews, **Bird Conservation International** will keep you informed about endangered bird species, habitat destruction, wildlife trade and recent scientific research findings. In addition, much of the journal's published material has its origins in ICBP's *Red Data Research Programme* (used by governments and environmental decision makers world-wide) and its *Conservation Programme of Field Projects*.

Essential reading for anyone interested in:

- species conservation
- preservation of habitats
- environmental issues
- ornithology

Subscription

Bird Conservation International is published quarterly in March, June, September and December. Volume 3 in 1993. £64 for institutions; £32 for individuals; £26 for members of the World Bird Club; airmail £13 per year extra. ISSN 0959-2709.

51352

Order from: **Max C. Thompson**, Assistant to the Treasurer A.O.U., Department of Biology, Southwestern College, 100 College Street, Winfield, KS 67156. Orders must be **prepaid**, in U.S. dollars; add **5 percent** (minimum \$2.00 U.S., \$4.00 all other countries) handling and shipping charge in U.S., and 20 percent (minimum \$3.00) for all other countries. Make checks payable to American Ornithologists' Union. Prices in parentheses are for A.O.U. members.

A Quarterly Journal of Ornithology
PUBLISHED BY THE AMERICAN ORNITHOLOGISTS' UNION

Editor: GARY D. SCHNELL, *The Auk*, Department of Zoology, Sutton Hall, 625 Elm Avenue, University of Oklahoma, Norman, Oklahoma 73019, USA. Telephone (405) 325-2784. FAX (405) 325-7504.

Managing Editor: NEIL J. BUCKLEY.

Associate Editors: JOHN L. TRAPP (Recent Ornithological Literature) and ROBERT M. ZINK (Book Reviews).

The Auk welcomes original reports on the biology of birds. Appropriate topics include the documentation, analysis, and interpretation of laboratory and field studies, theoretical or methodological developments, and reviews of information or ideas. Contributions written in English are encouraged from throughout the world.

Manuscript preparation.—Submit three copies of each manuscript, complete with tables, figure captions, and figures (retain original figures). **Double-space all written material** (including tables and figure legends) on standard-sized stationery sheets. Number pages through the Literature Cited. Do not hyphenate words at the ends of typewritten lines. Type tables separately from the text; type figure captions consecutively on a separate page. The manuscript should conform to general usage in recent issues (note stylistic changes incorporated in January 1992). The title page (numbered) should contain full title, and authors' names and addresses at the time of the research. The present address, if different, should be indicated as a footnote. The title page also includes running heads (<36 characters), and the name and mailing address of the individual to whom proofs should be sent.

An Abstract (<5% of paper length) should precede each regular article. It should summarize important premises, recapitulate findings, and give conclusions. Text citations should include the author and year (e.g. Darwin 1858, Wolter and Hunter 1968, Mayr et al. 1989); multiple citations should be arranged chronologically. Citations of specific page numbers, tables, or figures may be appropriate in certain situations (e.g. Diamond 1991:465–466, Zink et al. 1991:fig. 1, Dawson and Mannan 1991:table 6). Acknowledgments precede the Literature Cited. Title abbreviations of serial publications follow the International Serial Data System (ISDS) as indicated in *Serial Sources for the BIOSIS Previews Database* (1991, BIOSIS, Philadelphia), which is provided with *Biological Abstracts*. Scientific and English names of birds are given at first mention and follow the AOU's *Check-list of North American Birds* (1983) and its supplements. Measurements (and their designated abbreviations) are to be in SI units (see B. N. Taylor [Ed.], 1991, *The international system of units [SI]*, NIST Spec. Publ. 330, National Institute of Standards and Technology, U.S. Dep. Commerce, U.S. Government Printing Office, Washington, D.C.). In general, abbreviations of statistical terms conform to the fifth edition of the *CBE Style Manual* (1983, available from CBE, 9650 Rockville Pike, Bethesda, Maryland 20814). Use continental dating (e.g. 29 September 1990), the 24-hour clock (e.g. 0800 and 2035), and standard time (not daylight savings time).

Tables and figures should not duplicate material in the text or in each other. Each table requires a short heading; give particular attention to the form of table boxheads and do not include vertical rules. Illustrations should be prepared for one- or two-column width, keeping in mind the size of the *Auk*. The style of figures should be uniform. Helvetica or a similar sans serif style of type is recommended; typical typewriter lettering is unacceptable on figures.

After a paper has been accepted for publication, original figures and the original plus one copy of the manuscript (revised if necessary) are to be sent to the Editor. Illustrations in a large format are not desirable, since they are easily damaged or misplaced; if possible, original illustrations or high-quality reproductions should be no larger than standard-sized stationery sheets. On the back, each original illustration should have the figure number, author name, journal name, and an indication of the top of the figure. Drawings should be on good-quality paper and allow for about 20% reduction. Photographs should be glossy prints of high quality and approximately of the size they are to appear in print. Color figures will be considered as figure plates or a frontispiece.

Proofs, reprints, and charges.—Authors will receive page proofs for approval, along with the original typescript. Both must be returned within 48 h to the editorial office to avoid publication delays. A reprint order form will be sent with proofs; reprints are billed following the printer's current cost schedule. Because changes in proofs are expensive, authors should not expect to make major modifications in their work at this stage. Excessive alterations (i.e. more than about one line reset per two printed pages) in proofs will be charged to the author at the rate of \$3.00 per reset line. Authors should keep the Editor informed of address changes, so proofs will not be delayed. The AOU requests that authors, if possible, bear part or all of the cost of publishing their papers when grant, institutional, or personal funds are available for the purpose. Current costs per printed page are \$75; a minimum contribution of \$38 per page is recommended, but the AOU is pleased to receive any payment considered appropriate. Authors who do not have access to publication funds may request a waiver of this payment.

Books for review.—Forward books for review directly to: Robert M. Zink, Associate Editor for Book Reviews, Bell Museum of Natural History, 100 Ecology Building, University of Minnesota, St. Paul, Minnesota 55108, USA.
