CORMORANTS, DARTERS, AND PELICANS OF THE WORLD

Paul A. Johnsgard

"Johnsgard has once again produced an authoritative, impressively complete, and highly accurate reference book. His ability to synthesize the literature on a family of birds in a readable manner is unsurpassed."—

Betty Anne Schreiber, Research Associate,
Natural History Museum of Los Angeles
County

32 color, 81 line illus., 37 maps 448 pp. Cloth: 1-56098-216-0H \$49.00

THREATENED BIRDS OF THE AMERICAS

The ICBP/IUCN Red Data Book,

N. J. Collar, L. P. Gonzaga,
N. Krabbe, A. Madrono Nieto, L. G. Naranjo,
T. A. Parker III, and D. C. Wege

1992 1,150 pp. Cloth: 1-56098-267-5H \$75.00

ECOLOGY AND CONSERVATION OF NEOTROPICAL MIGRANT LANDBIRDS

Edited by John M. Hagan III and
David W. Johnston

"Ornithologists of all interests will find something to like in this volume."—C.R. Blem, *Wilson Bulletin*

"A must-have book for all working on this crucial problem."—*Bird Watcher's Digest*

"Based on a symposium hosted by Manomet Bird Observatory in 1989, this volume is essential reading for all ornithologists involved or interested in the conservation of Neotropical migrants. . . . [Gives] an excellent outline for future cooperative work aimed at the protection of migrants in their non-breeding grounds."—*World Birdwatch*

45 b&w illus. 610 pp. Cloth: 1-56098-113-XH \$48.00
Paper: 1-56098-140-7P \$17.95

NEW WORLD PARROTS IN CRISIS

**Solutions from
Conservation Biology**

Edited by Steven R. Beissinger and
Noel F. R. Snyder

"A very thorough and thought-provoking book."—*Journal of Field Ornithology*

"An excellent benchmark of the prevailing 'hot' issues in bird conservation biology. . . . A clear synopsis of controversial themes in conservation biology such as captive breeding and reintroduction."—*Ibis*

"Offers a variety of solutions for saving one of the world's most appealing animals, with benefits extending to other species."—*Science*

NEW SOFTWARE FOR ORNITHOLOGISTS

BirdBase 3 is even more powerful than its predecessor, described in an *Auk* review (v. 108, p. 456) as "specifically tailored for anyone who works with lists of birds...a great program." With all AOU N. American and Hawaiian species names this IBM software costs \$59.95 + \$3.00 shipping. With all the names in James Clements' *Birds of the World* also included it is \$99.95 + \$5.00.

BirdLexi adds to almost any IBM or Macintosh spelling checker the scientific and common names of the 9700 birds in Dr. Clements' book. Its *Auk* review (v. 109, p. 212) called it "a welcome contribution." The price is \$49.95 + \$3.00.

BirdArea, IBM software available in late 1993, knows the range of every bird species. It lists the species of many hundreds of different areas, marking those that are endemic to each area. With *BirdBase 3* data, the species are also marked if seen within the area, outside the area, or both. The cost is \$99.95 + \$5.00.

MasterCard, Visa, US dollar checks, and major organization purchase orders are accepted. Double shipping charges for overseas orders. Add 8% tax for CA orders. Be sure to specify the size of an IBM-compatible's floppy disk drive or, for a Macintosh using *BirdLexi*, of the floppy disk drive that is IBM compatible.

THE BIRDS OF SINGAPORE

CLIVE BRIFFETT

ILLUSTRATED BY SUTARI BIN SUPARI

This colorful book introduces the nearly 200 species of resident and migratory birds that have been documented in Singapore.

August 1993 126 pp.; 147 color and b&w illus.
7 maps; \$20.00

THE BLACK ROBIN

Saving the World's Most Endangered Bird

DAVID BUTLER AND DON MERTON

This book offers a fascinating first-hand account of how the Chatham Island black robin was saved from almost certain extinction.

1993 308 pp.; 51 color plates, 85 illus.; paper \$45.00

HANDBOOK OF THE BIRDS OF EUROPE, THE MIDDLE EAST, AND NORTH AFRICA The Birds of the Western Palearctic Volume VI: Warblers

EDITED BY STANLEY CRAMP

From reviews of previous volumes: "This monumental handbook series is probably the most important reference source to be produced in modern times. . . .Extremely rich illustrative materials, lengthy authoritative text, and marvelous organization." —*American Reference Books Annual*.

1993 760 pp.; 16 pp color plates; numerous maps and drawings \$130.00

HANDBOOK OF THE BIRDS OF EUROPE, THE MIDDLE EAST, AND NORTH AFRICA The Birds of the Western Palearctic Volume VII: Flycatchers to Shrikes

EDITED BY STANLEY CRAMP AND C.M. PERRINS

This seventh volume covers the flycatchers, tits, babblers, nuthatches, wallcreepers, treecreepers, sunbirds, orioles, and shrikes.

1993 610 pp.; 16 pp color plates, numerous maps and drawings \$130.00

Named an Outstanding Academic Book of 1993 by Choice

A DICTIONARY OF SCIENTIFIC BIRD NAMES

JAMES A. JOBLING

"Jobling's careful research, meticulously conducted on so large a scale, is a truly monumental achievement."—John Farrand, former editor of *American Birds*.

1992 304 pp.; numerous illus.; \$29.95

THE HANDBOOK OF AUSTRALIAN, NEW ZEALAND AND ANTARCTIC BIRDS

Volume 1: Ratites to Ducks, Parts A & B

EDITED BY STEPHEN MARCHANT AND PETER

HIGGINS ILLUSTRATED BY J.N. DAVIES

"A magnificent, pioneering work providing a comprehensive summary of information about the birds of Australia, New Zealand, and the Antarctic."

—*Wildlife Book Review*.

1991 1406 pp.; 400 color and b&w plates \$295.00

Forthcoming

THE HANDBOOK OF AUSTRALIAN, NEW ZEALAND AND ANTARCTIC BIRDS

Volume 2: Birds of Prey to Pratincoles

EDITED BY STEPHEN MARCHANT AND P. J. HIGGINS

ILLUSTRATIONS BY JEFF DAVIES

Volume 2 focuses on 119 species, with information on field identification, habitat, distribution and population, movements, food, social organization, social behavior, voice, breeding, and plumages.

November 1993 900 pp.; 220 color and b&w plates
\$295.00

Now available in paperback

BIRD POPULATION STUDIES

Relevance to Conservation and
Management

EDITED BY C.M. PERRINS, J.D. LEBRETON AND

G.J.M. HIRONS

"Although many contributors are involved, there is an overall cohesiveness. . . .Illustrative material is well executed. Strongly recommended." —*Choice*.

Oxford Ornithology Series 1

1991 (paper July 1993) 696 pp.; 155 illus.
paper \$36.00/cloth \$105.00

A FIELD GUIDE TO THE BIRDS OF BORNEO, SUMATRA, JAVA, AND BALI

JOHN MACKINNON AND KAREN PHILLIPPS

This book, with its descriptions of 820 species, provides the first complete identification guides to the birds of this teeming tropical paradise.

July 1993 576 pp.; 88 color plates; numerous maps
and drawings paper \$39.95/cloth \$98.00

Shorebirds of the Pacific Northwest

Dennis Paulson

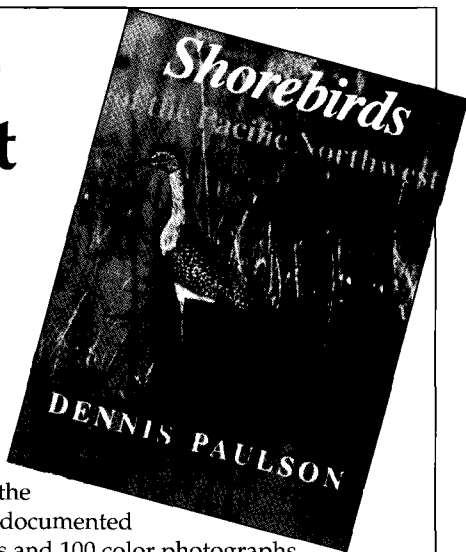

Drawings by Jim Erckmann

With its temperate protected estuaries and sandy coastal beaches, the Pacific Northwest is a shorebird haven. Embracing an area from southern British Columbia through Washington, Oregon, Idaho, and western Montana, this unique reference offers a wealth of information for the beginning as well as the expert birder. The book provides descriptions for 61 documented shorebird species, as well as finely detailed drawings and 100 color photographs.

Pub. with the Seattle Audubon Society

422 pp., 100 color photos, 62 b&w drawings, maps, tables, appendixes, bibliog., index

Clothbound, \$40.00 (Available from your local bookstore or call 1-800-441-4115)

The Frank M. Chapman Memorial Fund Committee welcomes applications for the Postdoctoral Fellowship Program in the areas of evolutionary and systematic ornithology. The Fellowship is usually for one year, but applicants may apply for two years, with a review of performance after the first year.

Deadline for applications is 15 January.

For application form and brochure, please write to:

Frank M. Chapman Memorial Fund

Department of Ornithology / American Museum of Natural History
Central Park West at 79th Street New York, New York 10024-5192, U.S.A.

A Quarterly Journal of Ornithology PUBLISHED BY THE AMERICAN ORNITHOLOGISTS' UNION

Editor: GARY D. SCHNELL, *The Auk*, Department of Zoology, Sutton Hall, 625 Elm Avenue, University of Oklahoma, Norman, Oklahoma 73019, USA. Telephone (405) 325-2784. FAX (405) 325-7504.

Managing Editor: NEIL J. BUCKLEY.

Associate Editor for Book Reviews: ROBERT M. ZINK, Bell Museum of Natural History, 100 Ecology Building, University of Minnesota, St. Paul, Minnesota 55108, USA (forward books for review directly to this address).

The Auk welcomes original reports on the biology of birds. Appropriate topics include the documentation, analysis, and interpretation of laboratory and field studies, theoretical or methodological developments, and reviews of information or ideas. Contributions written in English are encouraged from throughout the world.

Manuscript preparation.—Submit three copies of each manuscript, complete with tables, figure captions, and figures (retain original figures). **Double-space all written material** (including tables and figure legends) on standard-sized stationery sheets. Number pages through the Literature Cited. Do not hyphenate words at the ends of typewritten lines. Type tables separately from the text; type figure captions consecutively on a separate page. The manuscript should conform to general usage in recent issues (note stylistic changes incorporated in January 1992). The title page (numbered) should contain full title, and authors' names and addresses at the time of the research. The present address, if different, should be indicated as a footnote. The title page also includes running heads (<36 characters), and the name and mailing address of the individual to whom proofs should be sent.

An Abstract (<5% of paper length) should precede each regular article. It should summarize important premises, recapitulate findings, and give conclusions. Text citations should include the author and year (e.g. Darwin 1858, Wolter and Hunter 1968, Mayr et al. 1989); multiple citations should be arranged chronologically. Citations of specific page numbers, tables, or figures may be appropriate in certain situations (e.g. Diamond 1991:465-466, Zink et al. 1991:fig. 1, Dawson and Mannan 1991:table 6). Acknowledgments precede the Literature Cited. Title abbreviations of serial publications follow the International Serial Data System (ISDS) as indicated in *Serial Sources for the BIOSIS Previews Database* (1991, BIOSIS, Philadelphia), which is provided with *Biological Abstracts*. Scientific and English names of birds are given at first mention and follow the AOU's *Check-list of North American Birds* (1983) and its supplements. Measurements (and their designated abbreviations) are to be in SI units (see B. N. Taylor [Ed.], 1991, *The international system of units [SI]*, NIST Spec. Publ. 330, National Institute of Standards and Technology, U.S. Dep. Commerce, U.S. Government Printing Office, Washington, D.C.). In general, abbreviations of statistical terms conform to the fifth edition of the *CBE Style Manual* (1983, available from CBE, 9650 Rockville Pike, Bethesda, Maryland 20814). Use continental dating (e.g. 29 September 1990), the 24-hour clock (e.g. 0800 and 2035), and standard time (not daylight savings time).

Tables and figures should not duplicate material in the text or in each other. Each table requires a short heading; give particular attention to the form of table boxheads and do not include vertical rules. Illustrations should be prepared for one- or two-column width, keeping in mind the size of the *Auk*. The style of figures should be uniform. Helvetica or a similar sans serif style of type is recommended; typical typewriter lettering is unacceptable on figures.

After a paper has been accepted for publication, original figures and the original plus one copy of the manuscript (revised if necessary) are to be sent to the Editor. Illustrations in a large format are not desirable, since they are easily damaged or misplaced; if possible, original illustrations or high-quality reproductions should be no larger than standard-sized stationery sheets. On the back, each original illustration should have the figure number, author name, journal name, and an indication of the top of the figure. Drawings should be on good-quality paper and allow for about 20% reduction. Photographs should be glossy prints of high quality and approximately of the size they are to appear in print. Color figures will be considered as figure plates or a frontispiece.

Proofs, reprints, and charges.—Authors will receive page proofs for approval, along with the original typescript. Both must be returned within 48 h to the editorial office to avoid publication delays. A reprint order form will be sent with proofs; reprints are billed following the printer's current cost schedule. Because changes in proofs are expensive, authors should not expect to make major modifications in their work at this stage. Excessive alterations (i.e. more than about one line reset per two printed pages) in proofs will be charged to the author at the rate of \$3.00 per reset line. Authors should keep the Editor informed of address changes, so proofs will not be delayed. The AOU requests that authors, if possible, bear part or all of the cost of publishing their papers when grant, institutional, or personal funds are available for the purpose. Current costs per printed page are \$75; a minimum contribution of \$38 per page is recommended, but the AOU is pleased to receive any payment considered appropriate. Authors who do not have access to publication funds may request a waiver of this payment.
